

Test Plan Document

Project name : Sweet Shop

Site Under Test: <https://sweetshop.netlify.app/>

Prepared By: ATHULYA SASI

Date: 10.02.2026

Version: Sweet Shop Project 2018

1. Introduction

1.1 Purpose

The purpose of this test plan is to define the scope, approach, resources, and schedule for testing the Sweet Shop demo web application to ensure that key functionality, usability, navigation, UI, and basic reliability meet acceptable quality standards before any deployment or demonstration.

1.2 Objectives

- Validate that core functions (browsing products, adding to basket) work as expected.
- Verify navigation across site pages.
- Confirm UI elements display correctly and consistently.
- Ensure responsiveness across different devices/screen sizes.

1.3 Application Overview

The Sweet Shop demo is an e-commerce style application where users can:

- Browse a list of sweets
- View prices
- Add items to a basket/cart
- Navigate via menu links

There is no real backend payment processing; the emphasis is on frontend flows and user interaction.

2. Test Scope

2.1 In-Scope

Functional Area	Description
Homepage	Loads and displays correctly
Navigation	All menu links open correct pages
Product Listing	Items load, display images, names, and prices
Basket/Cart	Items can be added/removed, count updates
UI/Visual	Layout conforms to design expectations
Responsive Layout	Works across desktop/laptop, mobile viewports

2.2 Out-of-Scope

- Payment gateway or actual checkout transactions
- Backend authentication unless explicitly implemented
- Performance and load testing (site is demo/static)

3. Test Approach

This plan uses a manual testing approach with the following techniques:

- Functional Testing
- Usability Testing
- UI/Visual Validation
- Responsive Design Testing
- Cross Browser Testing

Testing will be performed using predefined test cases and documented defects.

4. Test Environment

Component	Environment
-----------	-------------

Application URL	https://sweetshop.netlify.app/
Browsers	Chrome, Firefox , Edge
Devices	Laptop , Mobile
Tools	Manual Test Logs

5. Roles & Responsibilities

Role	Responsibility
Test Lead	Oversees test planning and execution
Test Engineer	Executes test cases, logs defects
UI/UX Reviewer	Validates visual appearance and usability
Stakeholder	Reviews test results

6. Features to be tested

- Homepage & Navigation
- Product Listing
- Basket / Cart
- Login
- Basket
- Browse Sweets
- Your Basket/Payment

7. Defect Reporting

Defects will be logged with:

- Defect ID
- Title
- Description
- Steps to Reproduce
- Expected vs Actual
- Severity & Priority
- Screenshots
- Browser/Device

Severity Definitions:

Level	Meaning
Critical	Core functionality broken
High	Major feature doesn't work
Medium	Partial issue or minor feature
Low	Cosmetic/UI issue

8. Test Schedule

Activity	Duration
Planning	1 day
Test Case Creation	1 day
Test Execution	2–3 days
Defect Reporting	Continuous
Test Report	1 day

9. Entry & Exit Criteria

Entry Criteria

- Application URL accessible
- Test environment ready
- Test cases finalized

Exit Criteria

- All critical test cases executed
- All high severity defects fixed or mitigated
- Test summary report completed

10. Risks & Mitigations

Risk	Mitigation
Browser differences	Test across major browsers
Slow network	Test on simulated slow connections
Unclear specification	Clarify expected behavior early

11. Testing Documents Mentioned

1. Test Plan
2. Test Scenarios
3. Test Cases
4. Defect Report
5. Test Summary Report

11. Approvals

Role	Name	Signature
Test Lead
